1. PRODUCT DESCRIPTION

Build a Smarter, Connected World

PLANET LN1152 is an indoor LoRa node controller used for data acquisition from multiple sensors. It contains different I/O interfaces including analog inputs, digital inputs, relay outputs and serial ports to simplify the deployment and replacement of LoRaWAN networks. Besides, the LN1152 can trigger multiple conditions and actions without a network. With its industrial design and IP30 metal case, the LN1152 is widely used in indoor applications like smart industries, building automation, etc.

LoRaWAN-based Controller with Rich Industrial Interfaces

The LN501 LoRaWAN Controller with built-in multiple industrial interfaces connects to all types of sensors, meters and other appliances. It also bridges Modbus data between serial and Ethernet network via LoRaWAN. The LN1152 supports LoRaWAN class C protocol to be in full compatibility with standard LoRaWAN gateways including PLANET LCG-300 series. It is ideal for large-scale IoT application deployments, such as projects for building automation, smart metering, HVAC system, etc. With multiple interfaces, LoRaWAN Controller can perfectly help retrofit legacy assets into IoT enablement.
